

## GLOVES FOR EVERY SITUATION

### FELCO 701

Lightweight and comfortable, these gloves are made of knitted HPPE fiber and guarantee high resistance to cutting. The fingers and palm are coated with nitrile rubber to provide excellent grip and greater strength. Ideal for precise pruning work by winegrowers, landscape gardeners, fruit growers or nursery workers.

## A RANGE OF GLOVES FOR PERFECT PRUNING

FELCO launches a new line of Personal Protective Equipment (PPE) and its first range of pruning gloves: FELCO 701, FELCO 702 & FELCO 703.

Developed to protect hands against the risks of minor physical injuries while pruning, this new range of gloves is a natural addition to FELCO's product range.

FELCO gloves are designed for professionals and amateur gardeners looking for high quality protection. Available in four different sizes, from S to XL, the gloves adapt to the shape of your hand for the greatest comfort while pruning.

## FELCO 701: HIGH-TECH FOR YOUR HANDS

Highly resistant to abrasion and tearing, FELCO 701 gloves are made from 13-gauge HPPE (high performance polyethylene) fibre.

The "gauge" refers to the thickness of the weave, its value expressing the number of stitches per 2.5 cm of glove. Thus, 13-gauge gloves like FELCO 701 are finely woven, which increases the density and thus the tightness of the knitted fabric.

The palm is coated with nitrile rubber for better grip and greater strength. Elastic sewn into the base of the wrist ensures a perfect fit.

## FELCO - 75 YEARS OF HISTORY AND INNOVATIONS

Synonymous with quality and durability among pruning and cutting professionals, the FELCO brand is the culmination of 75 years of technological innovation serving professional and amateur gardeners.

FELCO 701
